

9 June 1971

Hoosier Archives is a Diplomacy gamefile published by Walter Friedman, 411 E. 20th Avenue, Indiana 46032, telephone (317) 482-2824; Archives Director, Hoosier Diplomacy Congress and V-P/Treas., International Diplomacy Association. It is devoted to articles on good play, rating systems, analyzed demonstration games played to order, such as the Old and New Lions Game (1971) now in progress, and game news. Information from my Diplomacy archives is vital for all this and is available to the public as well. Although the archives is virtually complete in as lesser extent form, missing well-sorted originals are solicited, either for purchase or a loan to permit xeroxing. Many other small games are now available from the archives, more are solicited so as to make them available to others. A subscription to Hoosier Archives is \$5/\$2.00 or \$6/\$3.00 (inc. residents add 4% sales tax). Sets outside the U.S. are \$6/\$2.00 or \$6/\$3.00. Back issues are 30¢ apiece. This is Atlanta Press publication #126. Paid/total circulation this issue: 130/241

HOOSIER ARCHIVES DEMONSTRATION GAME (1971/81)
(The Old and New Lions Game)
winter 1971

FILE TO JOHN D. SIME BILLY

ALGERIA: builds A Thi, A Ind (Also has: A Vie, A Ser, 1 Ger)
(Luth)

ANTWERP: builds F lon, (Also has: F Mar, F Nth, A Nwy)
(Luth)

BRANKE: builds I Bre, A Pac. (Also has: A Mar, F Per, A Spa)
(Hosanna)

CHERRY: builds F Mar. (Also has: A Pub, A Kie, F Don)
(Luth)

ITALY: builds F Mar. (Also has: A Ven, A Tur, F Lon)
(Luth)

MOBILE: builds F Sic(oc), A Mar. Also has: F Ser, A Mar, A Rom, F Ser
(Hosanna)

TURKEY: builds F Sky. (Also has: F Nth, A Bul, A Ger)
(Luth)

Due to the DipCon, the next issue will be delayed one week. Spring 1971 issues are therefore due not later than noon (9:00 A.M. for phone calls) on Saturday, 6 June 1971. For players didn't submit confidential spring moves this time, probably due to the many variables during the first year.

It should be mentioned that 2 of the players have address changes effective immediately. They are: Mike Hosanna--121 E. Hickman Ave., Madisonfield, N.J. 08053 and Randy Lyman--4 General Delivery, Mechanics, 12 Mendon Lodge, Ipswich, Mass. 01903.

Ken Laska asked that the following statement be published. I should say though that of the 3 players he mentioned, only mention for those presently using Hoosier Archives. Therefore, if mention turn down Laska's offer and Len doesn't get anyone else, John Verheiden's already moves will be used for Italy next time, Laska's message.

"I am being harassed by work for the Game Show and DipCon, and also by some personal problems. Until the Show is over, I just can't give full attention to this game and there. I request that a substitute play the entire year of 1972 for me. A country that does not negotiate is doomed and it would be unfair to all of you, and the operators, to not use the game the attention it deserves. I prefer one of these players to turn over Laska's old files, change format of our, Newing, even in highly capable of keeping a consistent game, at the pace necessary for the game."

1. What is the purpose of the study?
 The purpose of the study is to investigate the effect of the use of a mobile learning application on the learning outcomes of students in a mathematics course.

... The Velle ...
... The Velle ...

The US has not ruled. This is a case of Italian Naples is still the base of the fleet for the Eastern Sea. Rather it will move into the Eastern Sea. It is not clear if the Eastern Mediterranean or if it will move into the Tyrrhenian Sea to defend the defense of Italy against possible French attack.

Vagie (Amoral) will build armor to batapost and Triemo. They will be kept in the bottom for km. Bulbaso and the place to the east.

Beirut (Turkey) will build a fleet at Samsun. That is a defensive fleet to keep the Russians out of the Eastern Med and protect Turkey's own southern coast.

Nomadic (Russia) and Maritime to get sea routes. If we are to build both (which he doesn't have to do that will) they must be in Moscow and St. Petersburg. That means a Moscow will be sent southwest. The big question then for this winter is whether build to St. Petersburg (north coast) means war with England. A factor on the south coast means war with Germany, something which Hiram would love to see, building a St. Petersburg term Hiram the Russia will be defensively neutral for the reason. In the same sense, if you is sent southwest if and when the English warms Hiram based on lines from. I believe that Hiram will play things cautiously and will build a St. Petersburg.

Verheiden would be a good way if Verheiden drops out altogether from the game. Verheiden will be a good replacement, but he will be faced with the immediate problem of a lack of diplomatic contacts within the game. Verheiden has Russia, the United States, and China. He may be able to get a good deal of support from the United States and China. He may be able to get a good deal of support from the United States and China. He may be able to get a good deal of support from the United States and China.

Walter, an ex-convict (England) who had been found guilty of an offence in London, England, and who had served a long term in Germany. A former inmate and has been transferred to Scandinavia and the surrounding the provisions. My father is now for will serve in Germany.

THESE ARE THE LOGS OF THE

On September 17, December 1974, it was announced today that the Man Mohan, a well-known Indian leader, was recently placed on the National List of Madras. He was also placed on the National List of Madras. He was placed on the National List of Madras. He was placed on the National List of Madras.

surface being placed in contact, the newly exposed metal was found to form "black scale" formation. I was born a little later in the same place (New York City) and as soon as I began to remember (thanks to Melvin Kaplan) the details of reading and descriptions of these deposits, I was able to identify them as "black" which was undoubtedly the same as the "black" that was found on the surface.

"Will the vessel in the dock and also my unknowns for while. I guarantee my satisfaction and completion!"

On the verge of lapsing into a coma, the distraught clerk was rushed upstairs to the Intensive Care Unit.

ZURICH (NZZ) (2 November 1901): Latest updated odds on the war currently raging in Europe are as follows: Russia 2.9 to 1 against, Austria 5.3 to 1, France 5.6 to 1, England 7.6 to 1, Germany 8.2 to 1, Turkey 11.6 to 1 and Italy remains the delinquent at 9 to 1 against. Stay tuned for further developments.

BARAD: MILD DOWN (28 December 1901) (A Novi Sodom-Flossieland): Albeit infected by a spore of dyspepsia, Pope Joan the Indomitable has reappeared for the first time in many a fortnight to cast her eyes o'er the lands of strife and war, and issue her usual magnificent pronouncement to the proceedings which seem to be wafting one more time through the pages of neutral journals from Haykjavik to Lebanon, chronicling myriad events of the petty intercastine horse-apats of the seven current bughers purporting to equal the thrones of the Great Powers of Europe, as per the edicts handed down in the reign of al-laan, and developing some of the most esoteric signs of intractable vantage heretofore seen on the horizons of the lives we lead in this never-ending battle for truth, justice and the liberty of subjugation of those to whom it seems to drive the boats of fate, as scripted by the usual source, and presume to manage their limited affairs in a manner befitting only the most salubrious of intelligences, which is just about par for this course, if I do say so myself, which of course I do, in my usual stereotypically self-flattering high-pitched shriek of ecstatic rapture engendered by the insouciance of exceptional and putrescently phallic assertions of outrances into the glacial cautions of the bedfellow who is revised-golden-ruling you, clavering onces singing songs of staid and staid in your own available underbells, whichever of the numerous physiological elements of your person you have selected this week as the lucky recipient of the First de Movich awarded each year to the monthly champion in each day's recreational war-off the hour, who is, at least this time, as if it weren't always, and I assure you, though I don't have to, Lord knows, I think, under the circumstances notwithstanding, yes.

Forward, Christian soldiers, marching as to glory...

INTO THE ARCHIVES NO. 65

To present an interesting combination this time. First we have an article by one of our newer players on how Scandinavia affects the board, and second we have an update on Jeffrey Marshall's "Diplomacy USA." The hobby's numbers taker, Ray Powers, has still managed to stay ahead of his, however, as we now have over 1000 players in the hobby. Some of the foreign countries in particular have totals that are too low in Jeff's article: Australia, Britain, Italy and North Africa.

SCANDINAVIA, ENGLAND'S SPANISH ISLAND, OR AN ISLAND WITHIN ENGLAND

by Howard Moxley

Scandinavia, which for the purposes of this article will mean Denmark, Norway, Sweden, Finland and St. Petersburg is especially valuable to England. There's the obvious fact of the four centers all open to naval attack. Even better, they can be defended from land attack with only three units, thereby freeing one unit for duty elsewhere. If St. Petersburg out of Russian hands, the threat of fleets attacking England from coast flank is ended.

England's main adversary is usually Russia, but Scandinavia affects every country on the board. Germany has trouble finding units to commit up there, but if either of the other two becomes dominant in north Germany can be in trouble. Therefore, Germany is often to promote a stalemate. To France, Scandinavia is a welcome jewel to have agitated away from him. However, France may suddenly find England a little too strong for comfort, not to mention that Scandinavia can also be the basis of a German-French alliance. When France, Austria, and Italy look at Scandinavia, they see a whole lot of possibilities. A group of four centers which have their chance for a strategic victory.

If you don't know how to play Diplomacy with or without Scandinavia, please visit

- 7 - People/publisher ratio

The Northwest sector consists of all the states north of Virginia and west of Ohio, including West Virginia. The South is made up of all the states south of Virginia, Tennessee, and Oklahoma, including Virginia and Texas. Anything west of Texas, Kansas, Nebraska, and the Dakotas, including Alaska and Hawaii, are in the West, and the rest of the states make up the Central area.

The percentage of total people has somewhat shifted over to the foreign countries since we last published it a matter of fact it has more than doubled. This is due to a million times of interest abroad. The reason is that I had no "foreign" people in my list or instead of scattered mailing lists, as I did in my last edition.

California once again places first as with the people and publisher lists, and placed three others in the local lists for people and publishers.

State	No. of people	State	No. of publishers
California	25	California	15
New York	21	Michigan	10
Michigan	17	New York	7
Illinois	14	Illinois	5

San Ramon	1	San Ramon	1

There are many more cities listed in the mailing lists, but they are not included here. The cities listed here are the ones that have the most people and publishers.

Los Angeles, and the Los Angeles Convention Center, which is the largest convention center in the world, is also a major attraction for visitors to the city.

In 1981, the Los Angeles Convention Center was the site of the 1984 Summer Olympics, which were held from July 19 to August 1, 1984.

This is published by Salt Publishing and can be obtained only from them.

On the basis of the estimator, the BRM rating line orders players by a performance score determined from the formula $R = \bar{x} + (SDS/SDN)(1 - \rho^2)$. R is the number of completed regular season games for which that player is the player of the game. \bar{x} is the cumulative score in points from these R games. In each game a player receives 1 point for every player having done worse than he and gives one point to every player having done better. Players having done equally well exchange no points. Performances in a game are entered as follows: win, draw, or loss according to the order of supply and demand, elimination according to the season and year number. The first is entered as 1, the third elimination player's is 2 and so on. The term $(1 - \rho^2)$ therefore is a fraction of a point which the player on average has contributed per opponent in his games. The term $(1 - \rho^2)$ is a correction to balance over wide variances characteristic of the average score of a player rated on the basis of only one game. It appears that as R increases, dropping out of the formula the term $(1 - \rho^2)$ causes slight bias, but away in the right direction. The terms \bar{x} and SDS are represented the percentage points, and SDN the number of wins.

When a starting 11 is played by one of more replacement players, the player of record is determined as follows: any player who enters is credited to the starting 11; any player who enters at or greater is credited to the latest replacement player of that number. A score of 1/2 or 1 is given to the latest replacement player who enters and 1/2 or 1 is given to the original player.

One of the things we included in this listing, on the back of a calendar, was a list of the names of the people, and I depend on you to provide whatever credit is due to the individual and the government.

DOES THIS APPLY TO YOU?

1. Please accept this sample copy in lieu of a personal answer to your inquiry about postal Diplomacy. Time pressure forces us to do this, but we think you'll find Hoosier Archive is a good introduction to the hobby.
2. We hope you enjoy this sample copy. We solicit your subscription.
3. We understand you have started a Diplomacy zine. We solicit a trade with you so we can keep the archive complete, thus providing a vital service for the Diplomacy community. In fact, two copies of each of your issues would be appreciated so as to have a spare for the archives.
4. Welcome aboard. We are happy to have your subscription which is good through issue # _____.
5. This is your last/next-to-last issue. We hope you will renew your subscription.

THE MCCALLUM SYSTEM OF NOTATION

For ease in following the current demonstration game, a Diplomacy map is reproduced on the reverse side by permission of John Moot, the President of GRI. Incidentally, DIPLOMACY is a registered trademark for a game invented by Allan B. Calhauer and copyrighted by Games Research Inc., 500 Harrison Avenue, Boston, Mass. 02118. GRI sells the game for \$8.95 and the 1971 Rulebook for \$1.

To best follow the game and hopefully learn something from it, since it is being played and analyzed by experts, I would like to suggest to you the use of a recording system that was first proposed to me by John McCallum.

First of all, you will need seven crayons in the following colors: red (Austria), purple (England), blue (France), black (Germany), green (Italy), brown (Russia), and yellow (Turkey).

Now to use the McCallum system, you take this map, which is provided with each of the spring and fall seasons, and record the armies with a circle of the appropriate color and the fleets with a line. For the winter season, simply take the fall map and make square brackets around a unit built and round brackets around a unit removed.

Also, a good way to go from one season to another is to indicate an attack with an arrow and a support with a line and bar as illustrated. Additionally, an unsuccessful order or retreat can be indicated by a dotted line.
